# SOUND ABSORBERS

Frapett – creating good atmosphere since 1993

## IS IT JUST ABOUT NOISE?

---

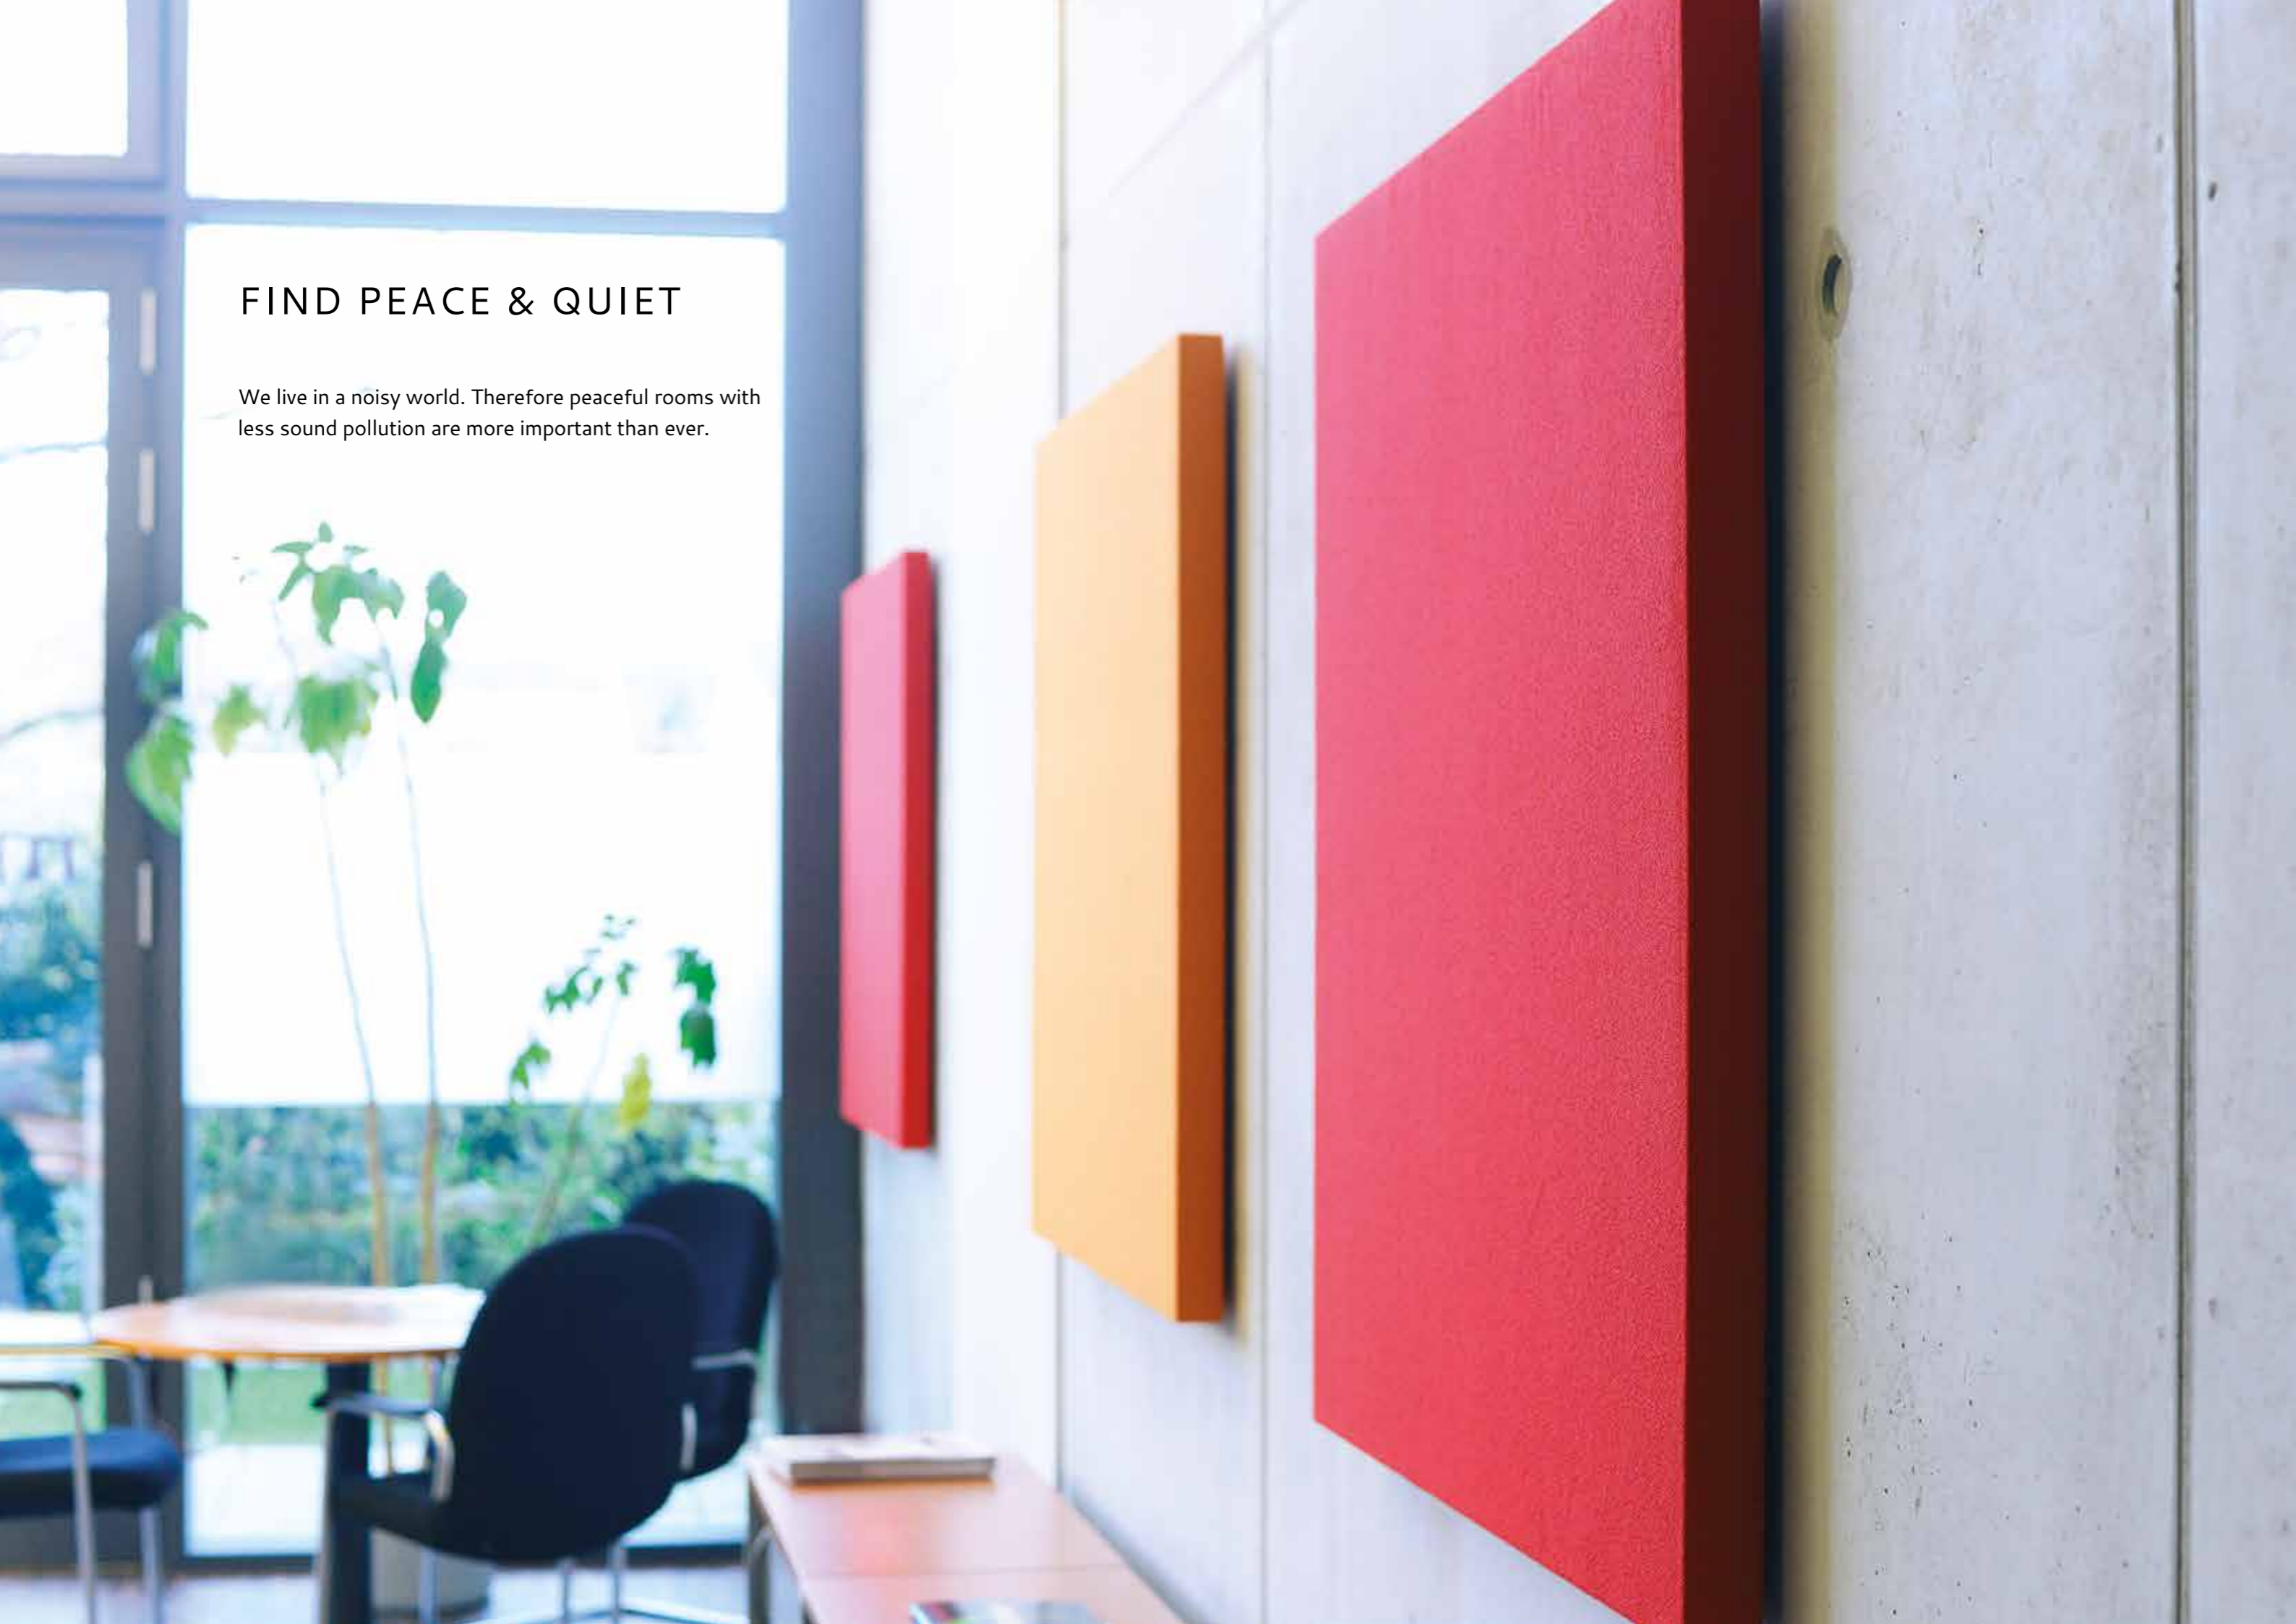

It stands to reason that a sound absorber will minimise noise, we know that. But we also know that interior design is so much more.

We have kept that in mind when we designed our customised acoustic solutions.

It is about noise, but also about a feeling. About design and colour. About the personality of and the atmosphere in the room.

## FIND PEACE & QUIET

We live in a noisy world. Therefore peaceful rooms with less sound pollution are more important than ever.

## EMPHASISE THE VISUAL

Colour and shape matter and help create visual focus in a room.

## CONFIRM YOUR IDENTITY

Let the company's identity shine through and become a natural part of your interior design.

## CREATE NEW ROOMS

Sound absorbers create rooms in rooms.  
Maybe you'll find a new favourite place for  
your morning coffee?

## LIGHT PARTITIONS

Don't shut out more than necessary. With efficient sound absorbers you can still let the light shine through.

## REINVENT YOUR SPACE

Mobile sound absorbers can be moved around easily to provide new, useful spaces time and time again. Reinvent the space you have and make it more flexible.

## CREATE HARMONY

Open working environments lead to meetings between people.  
Let meetings and movement go hand in hand with peace and quiet.

## EYEANDEAR

---

EyeandEar is a unique collection of sound absorbers from Designfabriken and Gunbritt Zachrisson.

Patterns and colours are created in collaboration with architects and clients for each specific project.

There is also a standard range of 8 patterns in a choice of colours and sizes. The sound absorbers can be wiped clean.

## UNIQUE ENVIRONMENTS

EyeandEar is easily adaptable to each and every architectural and interior requirement. The wall space shown here has had patterns and colours specially created for this particular environment.

## FREEDOM OF CHOICE

We want you to be able to choose freely, even without creating your own special design, and EyeandEar gives you that freedom. The standard range comprises 9 carefully chosen nuances in 8 different patterns.

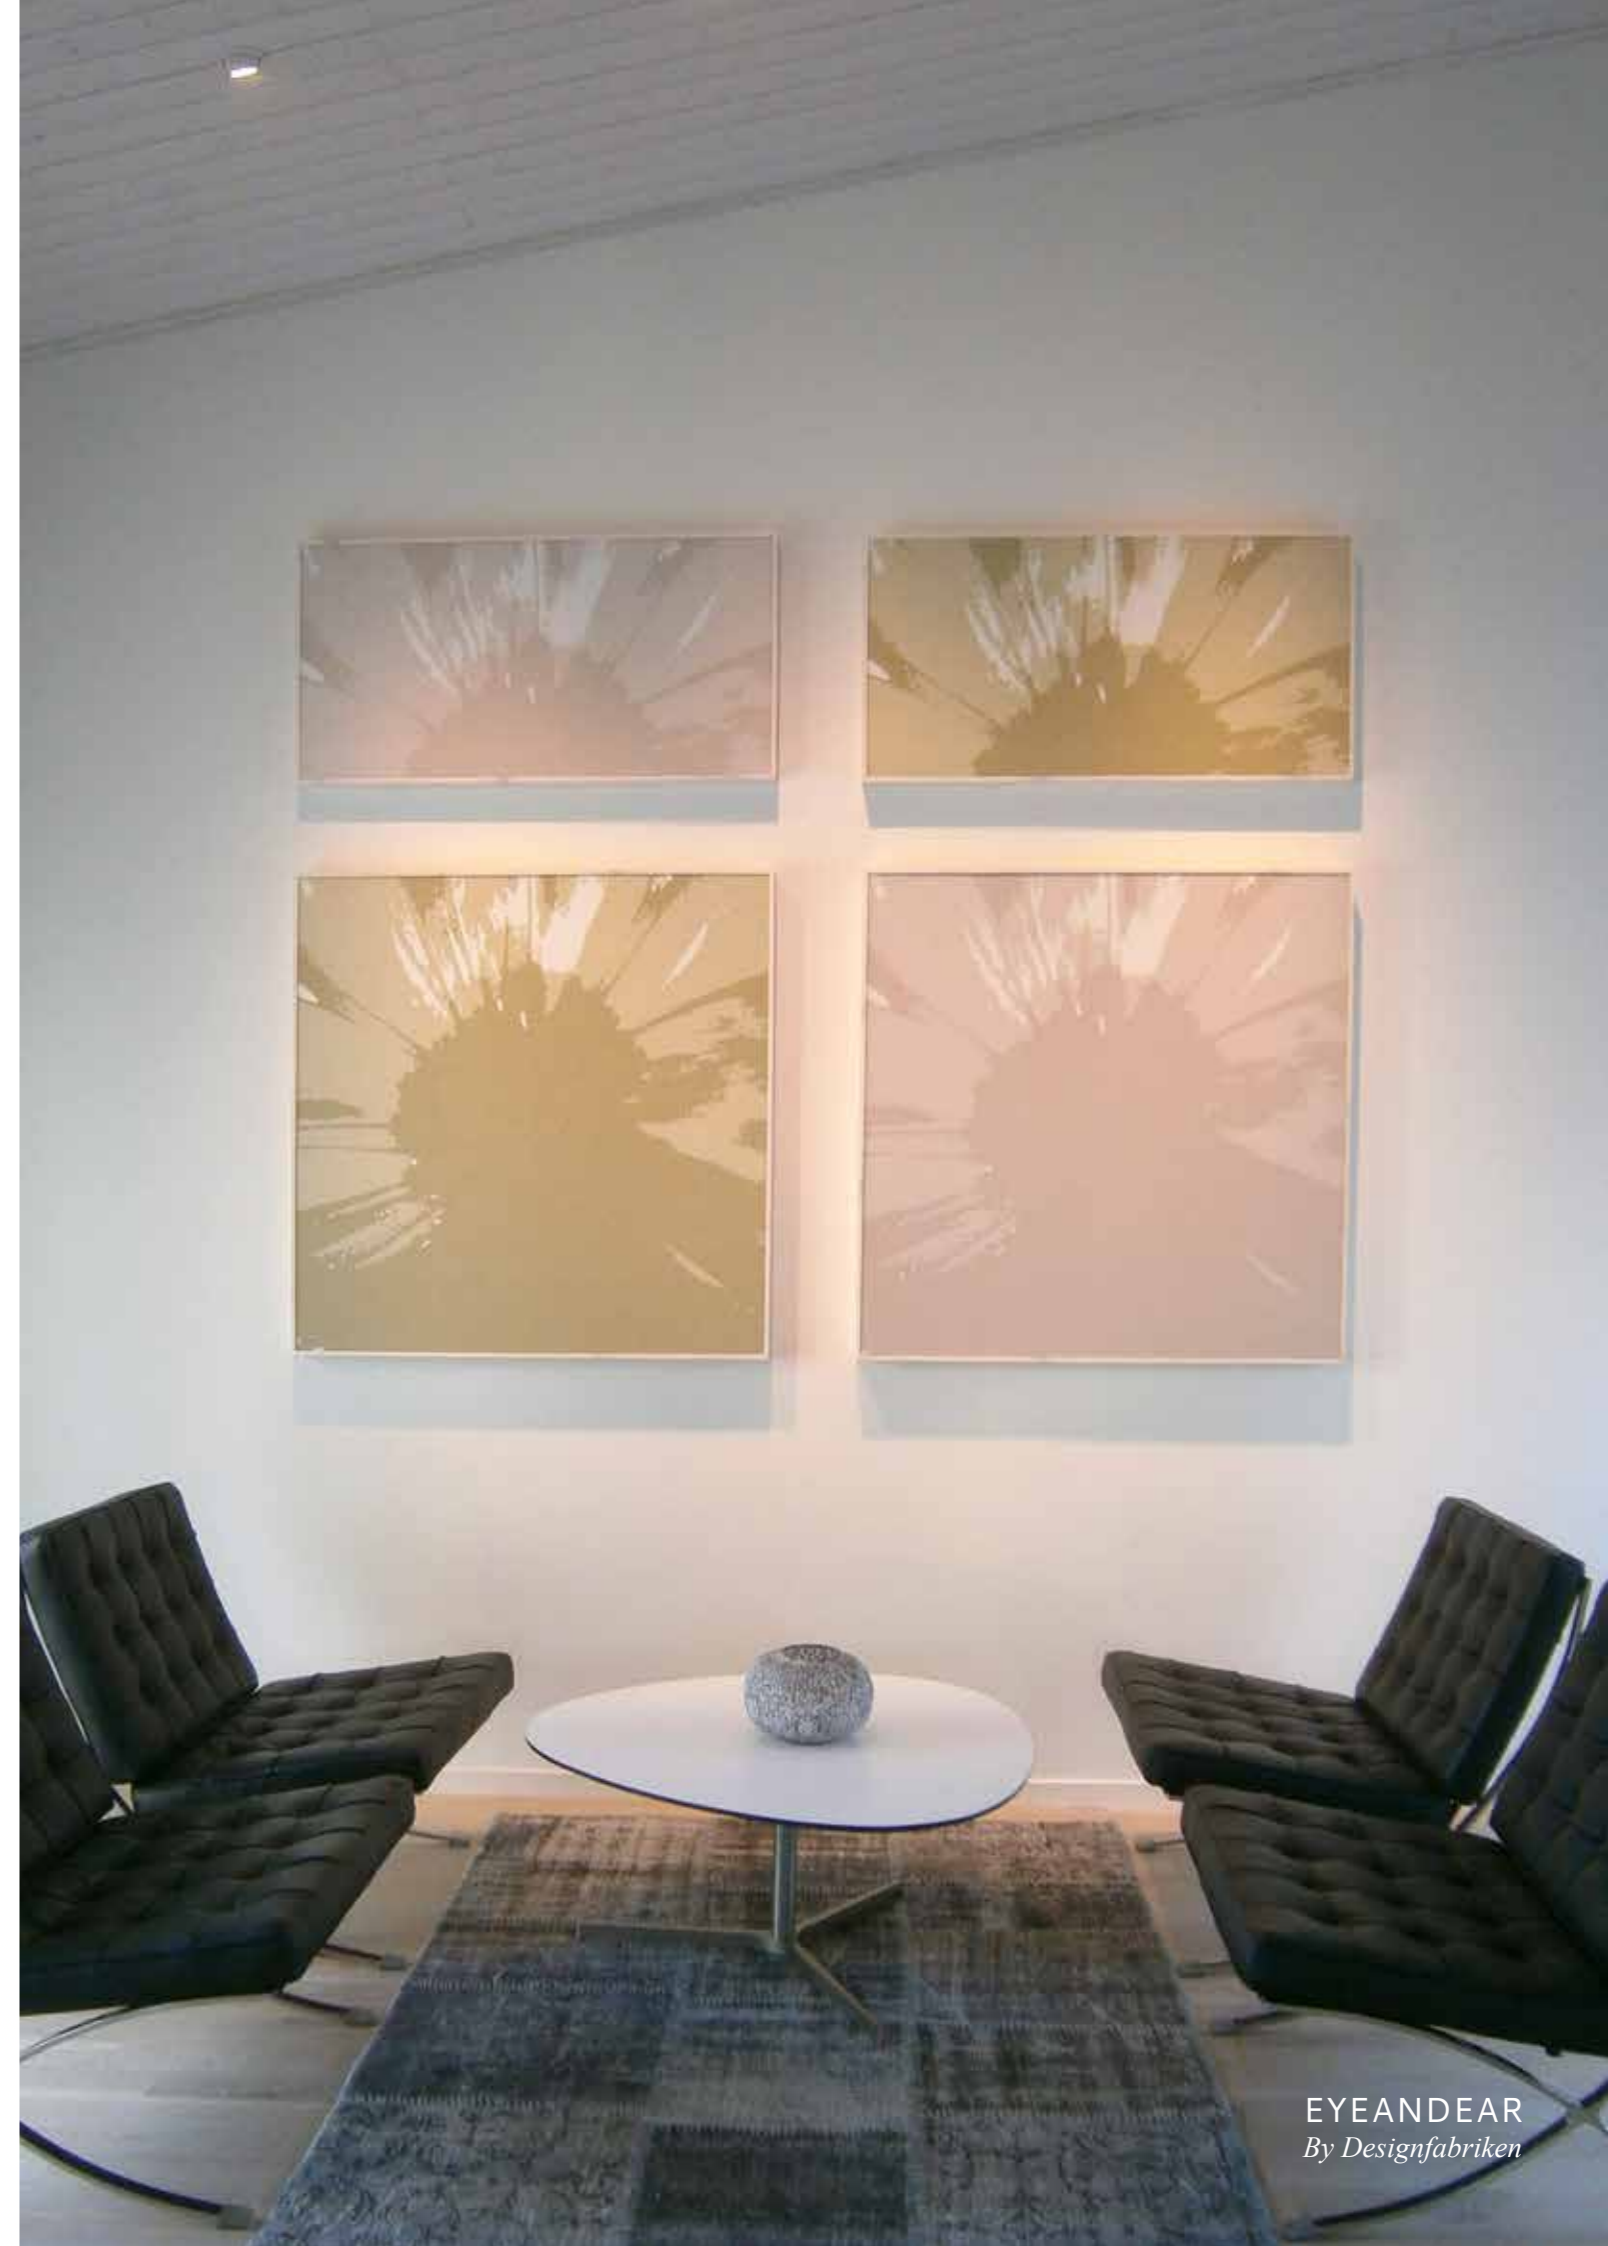

## FIND YOUR TONE

In EyeandEar's standard range there are circular absorbers with a steel frame in different colour tones. This shows Swing A in a russet red tone.

## FIND YOUR PATTERN

With EyeandEar's soft colours and classic patterns the absorbers suit just as well in the living room as at the office. This shows Aster in the standard yellow and pink colours.

## IN A FRAME

All the EyeandEar sound absorbers can be framed with an aluminium frame in your chosen colour. Suspended room dividers are printed with patterns on both sides.

## FINDING FOCUS

Sometimes we need to be able to block out our surroundings to find our focus. Our sound absorbing table screens are easily adaptable to numerous desk combinations.

## YOUR PRIVATE SPHERE

Dynamic office environments demand flexible solutions. This sound absorbing table screen lets you decide exactly how much private space you need.

## PERSONAL WORKPLACE

Sound absorbing table screens can be combined with a number of accessories that allow you to adapt each work station to suit any specific needs and requirements.

## EFFICIENT WORK SURFACE

Table screen with integrated toolbar. Use the toolbar to attach your screen, storage and other equipment and free up your work surface.

## STIMULATE CREATIVITY

It is always easier to be creative in an environment that appeals to your senses. Colours, shapes and designs in the office will help stimulate creativity.

## RELAXING ROOMS

We all need to calm down and take a break at times. Make sure that there are spaces designed to encourage relaxation and wellbeing.

## AIRING OPINIONS

A lively discussion can take over a room.  
Let people air their opinions without  
disturbing others.

## OLD FOR NEW

Replacing old ceiling tiles for new sound absorbing panels can do wonders for the atmosphere, visually and acoustically.

## FEEL AT HOME

With a pleasant sound level and the right pictures on the walls it is definitely possible to create personal rooms, even in a public environment.
