A close-up photograph of a hot air station being used on a PCB. The station consists of a black handle with a silver metal nozzle. The nozzle is positioned directly above a small, shallow metal pot that sits on the PCB. The PCB is populated with various electronic components, including several large electrolytic capacitors and smaller surface-mount components. The lighting is dramatic, with a strong blue and purple glow emanating from the background, highlighting the metallic surfaces of the hot air station and the components on the board.

JBC

The Soldering Co.

Hot Air Stations

Highest-quality contactless desoldering

Matronic

Hot Air Stations

JBC Hot Air Stations have the capability of controlling precise temperature and airflow.

JNA High-Precision Hot Air Station

It is perfect for reworking SMDs on areas with minimal separation without affecting nearby components. JBC Exclusive System enables the regulation of temperature and air flow at very low levels, in order to avoid the movement of adjoining components.

Auto-Start and Auto-Stop Function

The tool is turned on when lifted from the stand and the Auto-Stop Function guarantees that the heat is automatically cut off when the tool is in the stand. Thus **increasing safety and efficiency**.

Changing cartridge

Save time and increase productivity by using NAS Stand, which facilitates fast and safe exchange of the cartridge.

The perfect combination of the **NH Handle** and **Hot Air Cartridges** allows you to direct the heat onto the selected component. Thanks to its design and ergonomics, it enables you to work comfortably under a magnifying glass.

J125 and **J325** Cartridges are perfect to rework the smallest SMDs from 01005 to SOIC-8.

Specifications

Control unit dimensions	180 x 170 x 110 mm / 7.1 x 6.7 x 4.3 in	Temperature selection	Room Temp. / 150 - 450 °C / 300 - 840 °F
Control unit weight	1.35 Kg / 2.96 lb	Nominal power	70W
Ref. - Voltage (AC) / Fuse	JNA-9B - 100V 50/60Hz / Main fuse: T2A JNA-1B - 120V 50/60Hz / Main fuse: T2A JNA-2B - 230V 50/60Hz / Main fuse: T2A	Ambient operating temp.	10 - 50 °C / 50 - 122 °F
Airflow regulation	0.15 - 2.5 SLPM	Vacuum	53% / 397 mmHg / 15.6 inHg
		Rated current	0.85A

Control Temperature & Airflow

Profile Mode allows you to create and edit a profile to control three different parameters point by point: temperature, time to reach it and airflow percentage. It can store up to 25 different profiles.

TESE Precision Hot Air Station / JTSE Power Hot Air Station

TESE for rework of small and medium SMDs and JTSE for medium and large SMDs.

Thermocouple Connection

Connect an external Type K Thermocouple (TC) to set modes:

- **Regulation Mode** provides a high-precise close-loop to automatically maintain the external Thermocouple (TC) temperature.
- **Protection Mode** is used to protect any heat sensitive areas or components. The station cuts the air supply off when the TC temperature is reached.

Specifications

Control unit dimensions	148 x 184 x 140 mm / 5.83 x 7.24 x 5.51 in	Temperature selection	Room Temp. / 150 - 450 °C / 300 - 840 °F
Control unit weight	1.9 Kg / 10.86 lb	Nominal power	300W (TESE) 700W (JTSE)
Ref. - Voltage (AC) / Fuse	TESE-1B / JTSE-1B - 100-120V 50/60Hz. Input fuse: 8A TESE-2B / JTSE-2B - 230V 50/60Hz. Input fuse: 4A	Ambient operating temp.	10 - 50 °C / 50 - 122 °F
Airflow regulation	2-17 SLPM (TESE) 5-50 SLPM (JTSE)	Vacuum	30% / 228 mmHg / 9 inHg
		Rated current	3A (230 V) / 7A (100-120 V)

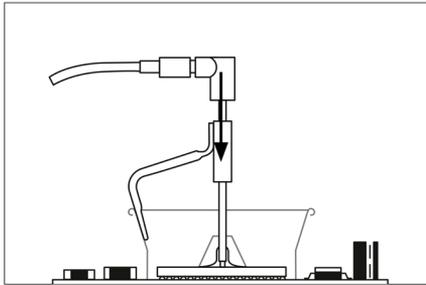

Hot Air Accessories

Quick and safe desoldering

JBC Hot Air Stations use extractors to protect adjacent components.

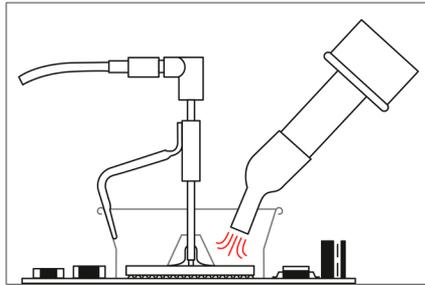

1 Positioning

JBC features a wide range of extractors, tripods and protectors so you can choose the most suitable one for the component.

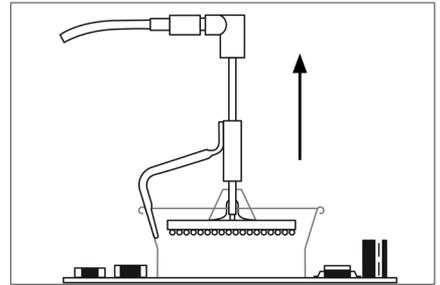

2 Heating

The adjacent components are protected by concentrating heat only on the component you are working on.

3 Releasing

The component lifts off automatically.

Choose the model to suit your desoldering needs
